

Masid Asghar

Dubai, United Arab Emirates | +971 559820063 | masidasghar@gmail.com

SUMMARY

Computer Science graduate with hands-on software development experience building responsive web applications using React.js, JavaScript, NestJS, REST APIs, and Git/GitHub. Experienced in developing frontend interfaces, integrating backend services, implementing AI-powered functionality, and collaborating across development, testing, debugging, and deployment workflows. Strong foundation in Data Structures & Algorithms, Software Engineering, Artificial Intelligence, and Database Systems, complemented by practical experience delivering application-focused projects. Motivated to build high-quality, scalable user experiences and grow as a Software Engineer in a fast-paced engineering environment.

EDUCATION

National University of Modern Languages (NUML), Rawalpindi, Pakistan

Bachelor of Science in Computer Science, CGPA: 3.5/4.00, Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Artificial Intelligence, Computer Networks, Operating Systems Sep 2022 – Jun 2026

EXPERIENCE

Web Developer

Sep 2025 – Jul 2026

Cortex Technology

- Developed full-stack web applications using React.js and NestJS, delivering responsive and scalable application experiences.
- Built reusable frontend functionality with React.js, JavaScript, HTML, and CSS while integrating application data through RESTful APIs.
- Designed and integrated REST APIs to enable reliable communication between frontend interfaces and backend services.
- Implemented AI-powered features within web applications to enhance functionality and support business processes.
- Participated across the software development lifecycle, including development, testing, debugging, and deployment.
- Implemented and managed a PostgreSQL database for a web application, optimizing query performance and ensuring data integrity, which improved system efficiency
- Used Git/GitHub for source control and collaborative development workflows.
- Technologies: React.js, JavaScript, HTML, CSS, NestJS, REST APIs, Git/GitHub, AI Integration

Software Development Intern

Jul 2025

Technology Rivers Private Limited

- Completed a software development internship with practical exposure to frontend development using React.js.
- Developed foundational backend knowledge using Node.js and explored the integration of AI concepts into software applications.
- Worked under professional supervision and gained experience with software development practices and technical problem-solving.
- Demonstrated adaptability, professional communication, and the ability to learn new technologies quickly.
- Technologies: React.js, Node.js, AI Integration, Machine Learning Fundamentals

PROJECTS

AI-Based Prediction of Autism Spectrum Disorder Using Brain sMRI | Final Year Project | React.js, Python, CUDA, AI/ML

- Developed an AI-focused research project investigating the prediction of Autism Spectrum Disorder using structural brain MRI (sMRI) data.
- Applied Artificial Intelligence and Machine Learning concepts to a complex healthcare-oriented research problem.
- Contributed to an application-oriented solution combining React.js frontend development with Python-based AI/ML processing.
- Worked with CUDA and deep learning concepts, including a 3D CNN-based approach for analysing volumetric MRI data.
- Translated complex technical and research concepts into an accessible software application.

Mobile Product Management Application | React Native | Firebase

- Developed a mobile product management application using React Native and Google Firebase.
- Implemented application functionality for managing product-related information using a cloud-backed architecture.
- Applied frontend development principles to create a practical, user-focused application.

Web & AI Development Projects | React.js | NestJS | Python | AI/ML

- Developed multiple websites and web applications using React.js, NestJS, HTML, CSS, and Python.
- Applied AI/ML concepts to software applications and explored the development of AI-powered models and agents.
- Built practical experience across frontend, backend, API integration, and AI application development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Responsive Web Development

Backend: NestJS, Node.js, RESTful APIs

Programming: Python, JavaScript, C++, Java

AI/ML: Artificial Intelligence, Machine Learning, Deep Learning, AI Integration, CUDA

Databases & Cloud: Firebase, Firestore, MySQL, PostgreSQL

Development Tools: Git, GitHub, Google Colab, VS Code, Dockers, AWS, CI/CD

Core CS: Data Structures & Algorithms, Software Engineering, Database Systems, Computer Networks, Operating Systems

CERTIFICATIONS

Artificial Intelligence – Machine Learning & Deep Learning | NAVTCC | 2026

Microsoft AI & ML Engineering | Coursera | 2026

AI Fundamentals | Google | 2026

Full Stack Web Development | Reqdev | 2024

LEADERSHIP & ADDITIONAL EXPERIENCE

Event Team Lead – NCSR, NUML | 2025 - Coordinated team activities and contributed to planning and execution of university-level events. - Developed communication, organisation, teamwork, and leadership skills through collaborative event management.

LANGUAGES

English – Professional Proficiency | Urdu – Native Proficiency
